

Web service package

A complete website and maintenance package for HK\$3000 / month
Built on the world famous content management system DRUPAL!

Overview

In the past 10 years little has changed in how website projects are handed over and billed for. We created this HK\$3000 / month service package as a solution to what most companies feel are major issues when sourcing for a website:

- **Large up-front investment**
- **Lacking support and maintenance**
- **Poor follow-up after site has gone live**

To address these issues

We decided that a flexible payment model (monthly, quarterly or yearly) that includes everything required to meet the clients needs such as an easy to update website with maintenance, support and hosting in one affordable package was the way to go.

Thanks to continuous contact with the client during the contract period we not only help the client but also develop an understanding of their unique needs and requirements that lay the foundation for a long and successful working relationship.

This service package provides a win win situation for all of us, which hopefully develops into a long lasting partnership built on mutual respect and mutual benefit.
